

**All the CIRCLE OF RAPHAEL'S talismans are created
and empowered using the identical
secret spiritual formulae used by the ancient Magi.**

But who exactly were the elite wonder workers known as the - MAGI?

The Magi are recorded as having one supreme wisdom which over-ruled all others and which simply stated that "All created things are number" They discovered that all life and physical phenomena is made up of transcendent mathematical patterns with an underlining creative force consisting of waves of pure spiritual consciousness. They recognised that placing the unique mathematical life number of a desired wish onto a talisman, would instantly connect the talisman with this creative force and cause any wish mathematically inscribed onto the talisman to manifest and benefit its owner. Surprising as it may sound, famous physicists such as Einstein and Hawkins now agree with the Magi that everything in the universe follows precise mathematical formulae. However, if you take the time to consider this, mathematics is simply a product of pure thought and yet both the ancient Magi and today's physicists claim that it contains a unique force that animates all things. It seems that the famous Mayan 2012 prophecies regarding a realignment of human consciousness and a new understanding of the ancient mysteries is already starting to come true when world renowned Physicists are in agreement with the ancient Magi that all created things are animated by a life force of pure mathematics. Numerous physicists have shown that the structures of the invisible quantum world not only follow precise mathematical formulae, but also that any physicist studying them will always get the result they **expected** or **wished** they would. However this should not really be the surprise it seems to be, in the light of the fact that we already know that all visible and invisible phenomena follow precise mathematical formulae. And we also know that mathematics is simply a product of pure thought.

The ancient Magi were well aware that the science of mathematics was simply a product of pure thought without any physical form or structure, and as such, it could be manipulated to create whatever they wished. When creating their miraculous talismans, the Magi used 'thought magic' animated by inscribing onto the talisman sacred words which correspond exactly to the mathematical formulae of the waves of pure spiritual consciousness which flows through all creation and which can manifest life changing angelic blessings & good fortune instantly in the life of the talismans owner.
