

# WHAT IS THE DIFFERENCE BETWEEN A TALISMAN AND AN AMULET

**Talismans** work in a positive way by attracting the casual Cosmic energies and Angelic influences necessary to create whatever effect or result its owner may desire. Our most successful general purpose talisman is the secret talisman Seven Angels.

**Amulets** help neutralise and repel certain forces and situations *before* they can promote an undesired or negative effect. To some extent talismans & amulets achieve the same result: An amulet which helps to wards off misfortune is after all doing much the same thing as a talisman which sets out to procure good fortune. Raphael's amulets are known to have the power to guide their owner away from danger & misfortune. Recently, one of our valued clients reported that she did not wish to leave an event, even when her inner voice urged her to do so. Only when she started to feel ill, at the same time as her Chi-ro Qabalah amulet became very hot was she compelled to leave the area with only moments to spare before a major tragedy. Our Chi-ro Qabalah amulet is, without doubt, the most effective & successful protective amulet in the world today.
